

Handbook of Atypical Parkinsonism

Edited by Carlo Colosimo

Università degli Studi di Roma 'La Sapienza', Italy

David E. Riley

Department of Neurology, University Hospital of Cleveland, Cleveland, OH, USA

and Gregor K. Wenning

Department of Neurology, Innsbruck University Hospital, Innsbruck, Austria

Improved diagnostic sophistication is increasingly enabling neurologists to differentiate between Parkinson's disease and other atypical parkinsonism (AP), such as multiple system atrophy, progressive supranuclear palsy, corticobasal degeneration, and dementia with Lewy bodies. The *Handbook of Atypical Parkinsonism* is a comprehensive survey of all diseases of this category, providing an authoritative guide to the recognition, diagnosis and management of these disorders. Each chapter follows a common structure, commencing with the full basic science of the disorder under consideration, followed by descriptions of the clinical picture and differential diagnosis. Subsequent chapters discuss current and future therapeutic approaches to these difficult conditions. Written and edited by leading practitioners in the field, clinicians in neurology and other specialties will find this book essential to the understanding and diagnosis of this complex group of disorders.

Contents

Preface; 1. Introduction; 2. Parkinson's disease and the spectrum of Lewy body disease; 3. Multiple system atrophy; 4. Progressive supranuclear palsy; 5. Corticobasal degeneration; 6. Parkinsonism - other causes; 7. The differential diagnosis of parkinsonism: a clinical approach; 8. Non-pharmacological treatment for atypical parkinsonism; Index.
